SPHERO

What is a Sphero?

A Sphero is a robotic ball controlled through smartphones and tablets and aims to foster a love of robotics, coding and STEM principles through play. The Sphero is ideal for all skill levels with the only limit being the bounds of your own imagination!

Pop on in to your local library in the Isaac Region to see what the Sphero is all about and delve in to a world of robots and tech.

For more information visit the Sphero page on SLQ Wiki.
