TRYITS

TRYIT Workshops are all about trying something new, testing new skills and experimenting. Launching a workshop series like TRYIT allows us to be reactive to what's happening around us; it gives us a platform to offer programs that you've told us you want, and with a short turn-around time. Workshops generally run for 2 hours and explore a different skill, plus you'll always have something to take home with you at the end.

current Tryit

2017-2018 TRYIT

These are the workshops we are currently running. If you are participating you can click on the links to follow the outlines.
